General Accounting Office, 2003 OCLC Number: (OCoLC)54344409 Subject: Postal service -- Maryland -- Brentwood. Excerpt: . . . 16 recommending the use of doxycycline instead. The switch to doxycycline was considered desirable for a variety of reasons, including its (1) lower risk for side effects, (2) lower cost, and (3) greater availability. Local and CDC officials we spoke with told us that they were challenged to explain the switch in medications and to address perceptions of differential treatment. Additional misunderstandings arose over the administration of nasal swabs to postal employees. Nasal swabs are samples taken from the nasal passages soon after a possible exposure to contamination to determine the location and extent of exposure at a site, but not to diagnose infection. Nasal swabs were administered to congressional employees on October 15 after the contaminated letter was opened to determine which employees might have been exposed and based on this where and how far the aerosolized anthrax spores had spread. Some Brentwood employees questioned why they did not also receive nasal swabs...
