Amongst the many problems that plague our planet, is the inability to effectively handle our own species. For centuries we have been gaining further independence from nature, and it seemed like we were making progress. But now, with increasing exploitation of limited resources, burgeoning human population, and ever-increasing polluting of our environment, our species is in danger (or endangered) of becoming out of our ability to control. This book will shed light on the possibility of finishing our job on this planet as a success rather than a failure. We must remember where we come from, who we are, what our true purpose here really is. All of these questions will attempt to be answered in this book. This item ships from multiple locations.
