

The Deadly Effect of Informatics on the Holocaust

By Andrew Targowski

Tate Publishing Company, United States, 2014. Paperback. Book Condition: New. 213 x 137 mm. Language: English . Brand New Book ***** Print on Demand *****.Andrew Targowski believes that the Holocaust could have been avoided or at least largely limited in scale. The mere use of the well preserved IBM punched-card machines contributed to the extermination of an excessive 4 million people. Before World War II, there were hardly any politicians who could have successfully opposed Hitler and Stalin. Poland, considered to be a small country among the European superpowers of those days, had a chance to manage its policies in such ways as to limit the scale of the Holocaust, and the losses of other nations could have been lower, as well. Alas, the then Polish leaders who - as the author proves in this work - held the trump cards in their hands did not live up to the task. They were guided by emotions and an ill-conceived idea of honor. The supreme driving factor, though, was the notion of Poland as a perpetual victim of history, an idea which was then dominant in the mentality of politicians and intellectuals. This was manifested in the fact that alongside Yugoslavia...
