Print on Demand *****.Hydro-plowing is a method of moving the oceans nutrients from where they are to where they re needed.

As time goes by we will need to turn more and more to the ocean for our supply of vital protein. Unfortunately the ocean seems to be slowly failing. Global warming appears to be the main culprit in this slow but steady decline. The solution to global warming is much simpler than most people think. Not only can we stop global warming, but at the same time we can produce hundreds of millions of tons of extra seafood. This exciting new book takes a completely different approach to solving global warming. We have billions of tons of excess carbon dioxide in our atmosphere, why not turn it into seafood? With hundreds of millions of people starving on our planet this plan will be a partial solution to their problems as well. This book doesn t pontificate against the production of carbon dioxide, it provides concrete solutions. The world will continue producing vast amounts of carbon dioxide for at least the...
